QUARTERLY REPORT FOR THE SECOND QUARTER ENDED 30 JUNE 2019

PART A - EXPLANATORY NOTES PURSUANT TO MALAYSIAN FINANCIAL REPORTING STANDARD 134

## 1. BASIS OF PREPARATION

The quarterly report has been prepared in accordance with the reporting requirements as set out in Malaysian Financial Reporting Standard ("MFRS") 134 "Interim Financial Reporting" and Paragraph 9.22 of the Bursa Malaysia Securities Berhad Main Market Listing Requirements ("Bursa Securities Listing Requirements") and should be read in conjunction with the Group's audited financial statements for the financial year ended 31 December 2018 and the accompanying explanatory notes attached to the unaudited condensed consolidated financial statements.

The significant accounting policies and methods adopted for the unaudited condensed consolidated financial statements are consistent with those adopted for the audited financial statements for the financial year ended 31 December 2018, except for changes arising from the adoption of MFRS 16 "Leases" as described below:

### Adoption of MFRS 16 "Leases" ("MFRS 16")

The Group has adopted MFRS 16 in the current financial period, where MFRS 16 supersedes MFRS 117 "Leases" and the related interpretations. Under MFRS 16, a lease is a contract (or part of contract) that conveys the right to control the use of an identified asset for a period of time in exchange for consideration. MFRS 16 eliminates the classification of leases by the lessee as either finance leases or operating leases.

MFRS 16 requires the lessee to recognise in the statements of financial position, a 'right-of-use' of the underlying asset and a lease liability reflecting future lease payment for most leases. The right-of-use asset is depreciated in accordance with the principle in MFRS 116 "Property, Plant and Equipment" and the lease liability is accreted over time with interest expense recognised in the statement of profit or loss.

On the date of initial application, the Group applied the simplified transition approach and did not restate comparative amounts for the period prior to first adoption. Right-of-use assets were measured on transition as if the new rules had always been applied.

The adoption of MFRS 16 impacts the Group's financial performance in the current financial period as below:

- (a) On the statements of profit or loss, expenses which previously included operating lease rentals within EBITDA as defined in Note 16, were replaced by interest expense on lease liabilities (included within 'finance costs') and amortisation of the right-of-use assets (included within 'depreciation and amortisation').
- (b) On the statements of cash flows, operating lease rental outflows previously recorded within 'net cash flows from operating activities' were reclassified as 'net cash flows used in financing activities' for repayment of the principal and interest of lease liabilities.

QUARTERLY REPORT FOR THE SECOND QUARTER ENDED 30 JUNE 2019

PART A - EXPLANATORY NOTES PURSUANT TO MALAYSIAN FINANCIAL REPORTING STANDARD 134 (CONTINUED)

## 1. BASIS OF PREPARATION (CONTINUED)

The Group has also adopted the following amendments to MFRS and Issues Committee ("IC") Interpretation that came into effect on 1 January 2019 which did not have any significant impact on the unaudited condensed consolidated financial statements upon their initial application.

- Amendments to MFRS 9 Prepayment Features with Negative Compensation
- Amendments to MFRS 119 Plan Amendment, Curtailment or Settlement
- Annual Improvements to MFRSs 2015 – 2017 Cycle
- IC Interpretation 23 Uncertainty over Income Tax Treatments

**MFRS, amendments and improvements to MFRSs and IC Interpretation that are applicable to the Group but not yet effective**

The Malaysian Accounting Standards Board had issued the following new standard, amendments and improvements to MFRSs and IC Interpretation, all of which are effective for the financial period beginning on or after 1 January 2020. The Group did not early adopt these new standards, amendments and improvements to MFRSs and IC Interpretation and they are not expected to have a significant effect on its consolidated financial statements:

- Amendments to MFRS 3 Definition of a Business
- Amendments to MFRS 101 and MFRS 108 Definition of Material

## 2. SEASONAL / CYCLICAL FACTORS

The operations of the Group were not significantly affected by seasonality and cyclical factors.

**14. SIGNIFICANT RELATED PARTY DISCLOSURES (CONTINUED)**

Notes:

The Group has entered into the above related party transactions with parties whose relationships are set out below.

Usaha Tegas Sdn. Bhd. ("UTSB"), Saudi Telecom Company and Harapan Nusantara Sdn. Bhd. are parties related to the Company, by virtue of having joint control over Binariang GSM Sdn. Bhd. ("BGSM"), pursuant to a shareholders' agreement in relation to BGSM. BGSM is the ultimate holding company of the Company.

The ultimate holding company of UTSB is PanOcean Management Limited ("PanOcean"). PanOcean is the trustee of a discretionary trust, the beneficiaries of which are members of the family of Ananda Krishnan Tatparanandam ("TAK") and foundations including those for charitable purposes. Although PanOcean is deemed to have an interest in all of the shares of the Company in which UTSB has an interest, PanOcean does not have any economic or beneficial interest in the shares of the Company, as such interest is held subject to the terms of the discretionary trust.

(1) Subsidiary of a company which is an associate of UTSB

(2) A company of which TAK is a major shareholder

(3) Subsidiary of UTSB

(4) Subsidiary of a company whereby a person connected to TAK has a deemed equity interest

\* Less than RM1 million.

**15. FAIR VALUE MEASUREMENTS**

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

**(a) Financial instruments carried at amortised cost**

The carrying amounts of financial assets and liabilities of the Group approximated their fair values as at 30 June 2019 except as set out below, measured using Level 3 valuation technique:

	<u>CARRYING AMOUNT</u>	<u>FAIR VALUE</u>

(A) Performance of the current quarter against the preceding quarter (2<sup>nd</sup> Quarter 2019 versus 1<sup>st</sup> Quarter 2019)

For the quarter ended 30 June 2019, service revenue decreased by 1.5% to RM1,918 million from RM1,947 million for quarter ended 31 March 2019. This decrease was largely driven by the phase out of a network sharing agreement. Service revenue, excluding wholesale revenue, increased by 0.6% to RM1,887 million in Q2'19 (Q1'19: RM1,876 million).

Postpaid service revenue for Q2'19 decreased by 2.8% to RM972 million (Q1'19: RM1,000 million) on account of a higher RGS base being offset by a lower ARPU; and termination of a network sharing agreement ending in December with limited roll over in to 2019. The Postpaid RGS grew by 96k, a 3.2% increase to 3,104k (Q1'19: 3,008k) contributed mainly by growth in MaxisONE Plan and Hotlink Postpaid Flex subscriber base. Our Hotlink Postpaid Flex and MaxisONE Share offering continued to attract entry level Postpaid subscribers, as well as those migrating from Prepaid to Postpaid. Postpaid ARPU decreased by 1.1% to RM91 for Q2'19 (Q1'19: RM92). Postpaid smartphone penetration at Q2'19 stayed at 88% (Q1'19: 88%) and data usage grew to 13.3GB (Q1'19: 12.2GB).

## 16. ANALYSIS OF PERFORMANCE (CONTINUED)

### (A) Performance of the current quarter against the preceding quarter (2<sup>nd</sup> Quarter 2019 versus 1<sup>st</sup> Quarter 2019) (continued)

Prepaid service revenue for Q2'19 declined by 0.8% to RM791 million (Q1'19: RM797 million). Prepaid RGS slightly declined by 50k, a 0.8% reduction to 6,417k (Q1'19: 6,467k) subscribers. We continue to see SIM consolidation and migration from Prepaid to Postpaid. Both the Hotlink Red and Superr Prepaid pack showed positive traction, attracting high mobile internet users, as we enhanced our use of data analytics to create value for our customers. Prepaid ARPU for Q2'19 increased 2.5% to RM41 per month from Q1'19 RM40 per month, the incremental increase in ARPU was a result of higher mobile internet income. Prepaid smartphone penetration maintained at a high level above 80% and data usage increased to 13.7GB (Q1'19: 11.5GB).

The Group retained its network superiority in 4G LTE, delivering download speed of more than 5 Mbps 90% of the time in key market centres on a comparable peer basis, and achieving 93% population coverage. Both these factors are key differentiators for digital lifestyle seekers. Delivering on its unmatched personalised experience promise, the Group improved on its high touch point net promoter score ("TP-NPS") to +58 (Q1'19: +55).

Normalised EBITDA for Q2'19 decreased by 0.6% to RM947 million with a normalised EBITDA margin on service revenue of 49.4% (Q1'19: RM953 million, normalised EBITDA margin on service revenue of 48.9%). The Group is committed to its Home Fibre ambitions and is investing the necessary capacity and capability in resources for the Enterprise segment, which are critical in creating the foundation for growth in future years.

The Group reported for Q2'19 a normalised profit of RM391 million, decreased by 3.2% compared to RM404 million in the preceding quarter. Capex for the current quarter was RM267 million (Q1'19: RM127 million), largely due to normal phasing of capex for the ongoing continued investment in network capacity to support our planned data traffic growth, investment in Home Fibre and Enterprise growth. Operating free cash flow for Q2'19 increased to RM1,021 million (Q1'19: RM565 million) due to higher payments in the previous quarter, as well as the productivity and working capital programs capturing results.

## 16. ANALYSIS OF PERFORMANCE (CONTINUED)

### (B) Performance of the current quarter against the preceding year corresponding quarter (2<sup>nd</sup> Quarter 2019 versus 2<sup>nd</sup> Quarter 2018)

Service revenue for Q2'19 of RM1,918 million was 4.7% lower, compared year-on-year (YoY) than RM2,013 million recorded in Q2'18. This was largely contributed by the termination of a network sharing agreement, decline in Prepaid RGS, and overall reduction in Prepaid and Postpaid ARPU, offset by the growth in Postpaid and Home Fibre subscribers. Service revenue, excluding wholesale revenue was RM1,887 million in Q2'19, a slight decrease of 0.7% compared to RM1,901 million in Q2'18.

Postpaid service revenue for Q2'19 decreased by 3.7% to RM972 million compared to RM1,009 million in Q2'18. The growth was supported by a solid 10.8% increase in subscriber base of 302k to 3,104k (Q2'18: 2,802k). Hotlink Postpaid Flex and MaxisONE Share continue to be strong catalysts driving incremental port-ins of entry-level Postpaid subscribers. Postpaid ARPU at Q2'19 decreased to RM91 (Q2'18: RM96), largely due to the change in the Mobile Termination Rates ("MTR") and ARPU dilution from Hotlink Postpaid Flex offerings.

Prepaid service revenue declined YoY by 7.4% to RM791 million from RM854 million on the back of a lower subscription base which was due to continued SIM consolidation, migration from Prepaid to Postpaid, and reduced MTR. Subscribers decreased by 330k from 6,747k at Q2'18 to 6,417k at Q2'19. Mobile internet revenue contributed to the stable underlying ARPU of RM41 per month. This was supported by our enhanced and expanded use of data analytics for segmental and personalised offerings, which attracted high data users.

Data consumption continued to increase YoY with data usage increasing in both Postpaid and Prepaid. Postpaid monthly average data usage for the quarter was 13.3GB, an increase from 11.2GB a year ago. Prepaid monthly average data usage for the quarter was 13.7GB, a significant increase from 8.2GB a year ago, and edging ahead of Postpaid data usage. This reflects the competitive nature of the mobile business and the bundling of more data and more value.

The Group continued to lead the market in terms of quality and best digital experience. The Group maintained our TP-NPS of +58 (Q2'18: +57), showing our commitment to deliver unmatched personalised experience.

Normalised EBITDA for Q2'19 declined 6.0% to RM947 million from RM1,007 million in Q2'18. The normalised EBITDA margin on service revenue was 49.4% for Q2'19, compared with 50.0% in Q2'18.

Normalised profit for Q2'19 declined 18.5% to RM391 million (Q2'18: RM480 million). This is in line with the revenue and cost drivers discussed in previous sections.

Capex for the current second quarter was higher at RM267 million (Q2'18: RM212 million), mainly due to incremental investment for Home Fibre and Enterprise growth. Operating free cash flow for the current quarter was RM1,021 million, compared to RM931 million in Q2'18 due to improved working capital management and productivity programs delivering results.

- <i>Blended</i>	<b>57</b>	57	-	-

Note:

<sup>(1)</sup> The comparative information of Postpaid has been restated to exclude non-phone based subscriptions.

The Group recorded a service revenue for YTD 2019 of RM3,865 million compared to corresponding YTD 2018 of RM3,993 million which represents a 3.2% decline, contributed by the termination of a network sharing agreement and decline in Prepaid that offset the growth in Postpaid and Home Fibre business.

Postpaid service revenue for YTD 2019 declined by 1.1% to RM1,972 million (YTD 2018: RM1,994 million). The Group grew the subscriber base by 302k which represents a 10.8% increase on YTD 2019 versus YTD 2018 and the ARPU decreased by 4.2% over the same period from RM95 to RM91, largely due to the change in the MTR.

Prepaid service revenue for YTD 2019 declined by 6.8% to RM1,588 million (YTD 2018: RM1,703 million) was mainly attributed to a lower subscription base of 330k, which was impacted by the continued SIM consolidation, migration to Postpaid. ARPU remained relatively high and stable at RM41 per month.

Demand for data continued to grow across the Group's customer base with average data usage in both Prepaid and Postpaid exceeding 13GB per month. This was supported by the increase in smart-phone penetration to 84% on a blended basis.

Normalised EBITDA and EBITDA margin on service revenue for YTD 2019 was respectively RM1,900 million (YTD 2018: RM2,027 million) and 49.2% (YTD 2018: 50.8%). Consequently, YTD 2019 normalised profit for the year was lower by 19.7% at RM795 million (YTD 2018: RM990 million).

Capex for YTD 2019 was RM394 million versus YTD 2018 of RM319 million, 23.5% higher than the preceding period due to higher investment for capacity. Operating free cash flow for the current YTD 2019 was RM1,586 million compared to RM1,490 million (after normalising for spectrum assignment fees) in the preceding YTD 2018 mainly due to improved productivity and working capital management.

(D) STATEMENT OF FINANCIAL POSITION

Note:

<sup>(1)</sup> Debt includes derivative financial instruments designated for hedging relationship on borrowings but excludes payables under deferred payment scheme.

The increase in total assets was mainly due to the recognition of right-of-use assets, arising from the adoption of MFRS 16. This has caused a corresponding increase in debt which includes lease liabilities. Total equity of the Group remained stable. Net debt-to-EBITDA increased from 1.86x as at 31 December 2018 to 2.21x as at 30 June 2019 mainly as a result of increase in lease liabilities as explained above.

## 17. PROSPECTS FOR THE FINANCIAL YEAR ENDING 31 DECEMBER 2019

Our guidance remains unchanged for the full year ending 31 December 2019.

The market is expected to remain competitive and Maxis continues to focus on its long term ambition being Malaysia's leading converged communications and digital services company, leveraging on its strong 4G Network and expanding its presence in the Fixed Broadband market in both Consumer and Enterprise.

In the mobiles market we will focus on building upon our core offerings in the Consumer and Enterprise segments with innovative new solutions and services. In the Fixed Broadband market we will focus on executing new access agreements with access providers, migrating our existing base to new price points and higher speeds and providing new innovative solutions to both Consumer and Enterprise customers and increased bundling.

Our priorities remain to execute our growth strategy whilst maintaining leadership in the core mobile business.

Notwithstanding the above actions and strong fundamentals in our core mobile business, there are a few key items impacting the Group's EBITDA in year 2019 as previously stated:

- the impact of changes to a major wholesale network sharing agreement in the Q1'19 and Q2'19;
- dilution in Fibre ARPU from the new competitive priced plans and the cost of customer migration initiative coupled with increase in cost to serve; and
- increase in cost of business from Sales & Service Tax introduction.

After incorporating the effects above, and the implementation of MFRS 16 as disclosed in Note 1, our guidance for the financial year ending 31 December 2019 remains unchanged:

- service revenue and EBITDA to decline by low single digit and mid-single digit respectively;
- core network capital expenditure to be around RM1 billion plus capex supporting new growth opportunities in Broadband and Enterprise business (around RM1 billion over 3 years); and
- operating free cash flow (excluding upfront spectrum fee assignment) at a similar level to year 2018.

In view of market opportunities and the change in regulatory environment, the Group is implementing a significant change in strategic direction building on its strong mobile base to deliver its internal annual service revenue target in excess of RM10 billion by year 2023. The Group's vision is to be Malaysia's leading converged communications and digital services company; achieved through maintaining its leadership in core Consumer mobile, taking advantage of its first mover position in Fibre and offering differentiated and customised solutions to both Consumer and Enterprise Business segments.

There have been no changes since the end of the previous financial year ended 31 December 2018 in respect of the following:

- (i) the market risk and credit risk associated with the derivatives;
- (ii) the cash requirements of the derivatives;
- (iii) the policies in place for mitigating or controlling the risks associated with the derivatives; and
- (iv) the related accounting policies.

(b) Gains/losses arising from fair value changes of financial liabilities

The Group determines the fair values of the derivative financial instruments relating to the IRS and forward foreign exchange contracts using a valuation technique which utilises data from recognised financial information sources. Assumptions are based on market conditions existing at each reporting date. The fair values of IRS are calculated as the present value of estimated future cash flow using an appropriate market-based yield curve. The fair values of forward foreign exchange contracts are determined using the forward exchange rates as at each reporting date.
